Video Ureteroscope

Extraordinary

Stryker’s URT-7000S/7000Si Video Ureteroscope is designed to provide the best in class image resolution, articulation, and durability to fuse the perfect solution for Ureteroscopy. Chip-on-a-tip video technology promotes a clear and bright high definition output. Surgeons now have the power to visualize and maneuver through the entire urinary tract with ease.

Intuitive Design

By combining smooth articulation, four programmable buttons, and a fully rotating working channel, the URT-7000S/7000Si is designed to promote the ideal ureteroscopic experience. The fully rotating working channel allows the insertion of instrumentation from both sides, maximizing working functionality.

Dual Articulation

Optimal accessibility is provided in both kidneys through 240º of articulation. Primary active and secondary passive articulation allows an excellent view of the upper and lower poles.

Features & Benefits

- 9.6 Fr distal tip provides non-invasive access
- 3.8 Fr working channel for optimal treatment and fluid management
- 360º light radius articulation
- Built-in LED illumination
- High Definition Picture Quality
- Utilizes Stryker’s Flexible Control Unit which can also be used with other Stryker Endoscopy Flexible Endoscopes

Platform Integration

The URT-7000S/7000Si connects to the Stryker Flexible Control Unit (FCU) which is compatible with many other Stryker Flexible Endoscopes giving each account additional operational and purchasing freedom as well as a robust urology platform.

The Video Ureteroscope also contains a built-in LED light source which eliminates the need for an additional light source while giving the surgeon the ability to control light levels from the camera head.
