Red, white and blue colors with eagle and flag insignia

Siderails are BackSmart™ designed with one-hand operation and an intermediate support position for patient assistance during bed entry and exit

iBed™ Awareness and three-zone Chaperone® Bed Exit System monitor bed status and patient position to help reduce falls

One-touch in-bed scale provides accurate weight with the patient and the bed in any position

Open architecture of S3 accepts any standard support surface, any form of traction, and is compatible with the vast majority of nurse call and networking systems

The S3 Patriot Series med/surg bed provides exclusive BackSmart features for your caregivers. This is a bed designed for operation with less force, less bending, and less strain to back and muscles. This ease of operation is important because most nurses at veterans' facilities have invested 10–20 years in their careers. The S3 Patriot Series bed provides important protection against injuries among these most experienced caregivers.

The S3 Patriot Series is truly safe and secure as it monitors patient position in three zones and 30-degree Head Of Bed angle to reduce the risk of ventilator-associated pneumonia. The Stryker S3 offers one-hand operation of siderails, center-mounted brake, one-touch in-bed scale and superior ergonomics to reduce bending and twisting that can injure caregivers.

The S3 Patriot Series bed offers more than just a strong, patriotic image. It's an evolution of Stryker's Secure® line of beds, the standard of care preferred by more hospitals than any other.

The S3 Patriot Series beds are made available to VISN chapters through a partnership between Alliant Healthcare Products and Stryker Medical.
