

Service from Stryker

ProCare for Navigation

ProCare Service and software support when you need it. Maintain an up to date and efficient OR through software upgrades and equipment coverage. Receive the latest software updates through our Software Maintenance program in addition to our Hardware and Instruments service plans.

Features & Benefits

- **Hardware Service Plan**

This plan covers your entire Navigation Cart Assembly including Computer, Camera, Monitors, Arms, Cables and more. Avoid repair and/or replacement costs associated with these components. Also, while covered under the Hardware Service Plan, labor and travel is included for all repair and preventative maintenance visits on your Navigation System.

Included

- Replacement Parts & Shipping
- Labor and Travel associated with Repairs
- Annual On-Site Preventative Maintenance Inspection
- Annual camera accuracy check

- **Instruments Service Plan**

Eliminate unforeseen replacement costs associated with your smart instruments.

Included

- Replacements of any instrument requiring service
- Preventative Maintenance Inspections
- Freight for replacements

- **Software Maintenance Plan**

Keep your Navigation System running at optimal conditions and ensure it is outfitted with the latest technology with our Software Maintenance Plan.

Our Software Upgrades, which integrate the latest surgical software features, will maximize your systems surgical effectiveness and usability. Also ensure that all functions are operating at best possible performance with Operating System and Software Application updates. Coverage is available for each individual module.

Included

- Software Upgrades
 - New Technology for your Module
- Software Updates
 - Module improvements, not adding features
- Operating System Updates
 - Application and file management enhancements
- Installation and training for all upgrades and updates
