

Confidence is A Powerful Tool

Service from Stryker

ProCare

The ProCare program combines proactive maintenance with fixed service and replacement costs providing you with maximized performance, exceptional reliability, and budget piece of mind. This ensures your investment is protected and you'll have the power to shape the future of better outcomes.

Handpiece

ProCare coverage limits your concern and can provide considerable cost savings for the lifetime of the system. Ultrasonic handpieces are high technology instruments that have the potential of being damaged beyond repair during cleaning, assembly, or staff handling. The coverage provides you with a NO QUESTIONS ASKED free replacement program, eliminating expensive replacement costs.

Proactive Maintenance is A Powerful Tool

Service from Stryker

Preventative Maintenance

Annual preventative maintenance is included in your ProCare coverage. This benefit is critical for high technology products and will ensure your investment is maximized. You will also minimize downtime of the SONOPET system with this proactive care. To ensure maximum convenience, free loaners will be provided as requested while your system is being inspected and upgraded.

Preventative Maintenance is the key to avoiding:

- Failure in the OR
- Surgeon irritation
- Staff frustration and stress
- Risk to patients and staff
- Liability
