Introducing **Mako Shoulder**

**Bringing together Mako,
Tornier and Blueprint**

The next generation of Mako isn't just about what it does. It's about who it serves—more surgeons, more patients, across more specialties and more procedures.

Mako means more than ever.

Mako means more

Three trusted names. One elevated experience.

Mako Shoulder combines **Tornier implants, Blueprint planning software** and **Mako SmartRobotics™**.

Mako Shoulder leverages AccuStop™ haptic technology for guided reverse shoulder glenoid implant preparation for primary joint replacement, including the glenoid surface, boss and post/screw.

Improved accuracy with **Mako Shoulder.**

In a validation study using anatomic bone models, surgeons were able to perform glenoid prep and place implants according to a preoperative plan significantly better when using a robotic-arm assisted end effector burr with haptic boundaries than when performing manual glenoid prep with standard instrumentation.¹

This document is intended solely for the use of healthcare professionals. A surgeon must always rely on his or her own professional clinical judgment when deciding whether to use a particular product when treating a particular patient. Stryker does not dispense medical advice and recommends that surgeons be trained in the use of any particular product before using it in surgery.

The information presented is intended to demonstrate the breadth of Stryker's product offerings. A surgeon must always refer to the package insert, product label and/or instructions for use, including the instructions for cleaning and sterilization (if applicable), before using any Stryker product. Products may not be available in all markets because product availability is subject to the regulatory and/or medical practices in individual markets. Please contact your Stryker representative if you have questions about the availability of Stryker products in your area.

Stryker Corporation or its divisions or other corporate affiliated entities own, use or have applied for the following trademarks or service marks: AccuStop, Blueprint, Mako, SmartRobotics, Stryker, Tornier. All other trademarks are trademarks of their respective owners or holders.
