ComfortGel SE assists in improving patient outcomes through pressure redistribution and enhanced comfort.¹

Transforming the standard of stretcher support surfaces

When we developed the SE series of stretcher surfaces, we focused our innovative design on aiding in proactive prevention. ComfortGel SE was designed with the overall patient experience in mind and has specific features to help redistribute pressure and enhance patient comfort.

Key Features

- Aids in the treatment and prevention of pressure injuries¹
- Gel design affords memory and durability
- Sloped heel section assists in offloading pressure from patient’s heels
- Slip-resistant bottom material eliminates the need for Velcro
- Three-sided zipper enables caregivers to more thoroughly inspect the condition of internal components

CoreGel Technology

Located in the sacral region, CoreGel creates a positioning pocket to help prevent patient migration.² Its design helps absorb and disperse patient weight to aid in pressure redistribution.

Cover design

ComfortGel SE’s surface cover provides increased chemical resistance; high-frequency sealed seams, and a three-sided zipper for better visibility during internal component inspections.

Welded seams

Knowing surface seams are a common problem area for infection, our covers are sealed with a specific type of RF welding utilizing electromagnetic bonding to limit fluid ingress and infiltration.

Slip-resistant bottom

ComfortGel SE’s bottom features a slip-resistant material to help improve infection prevention through the elimination of Velcro while maintaining affixation to the stretcher during patient movement and transfer.
**Standard Features**

- CoreGel Technology
- Polycarbonate polyurethane cover
- Welded seams
- Sloped heel section
- Three-sided zipper
- Slip-resistant bottom

Stryker reserves the right to change specifications without notice.

**Warranty**

Stryker Medical, a division of Stryker Corporation (“Stryker”), warrants that its Model 1805 ComfortGel SE Support Surface Product will be free from defects in material and workmanship. Stryker’s warranty covers only the following items during normal use as follows:

- Internal components: three (3) years
- Fire barrier: one (1) year
- Support surface cover: one (1) year

1. Recommended to be implemented in combination with clinical evaluation of risk factors and skin assessments made by a health care professional.

2. Best when used in combination with a stretcher equipped with Lift Assist Backrest

Stryker Corporation or its divisions or other corporate affiliated entities own, use or have applied for the following trademarks or service marks: ComfortGel SE, CoreGel, ShearGel, Stryker. All other trademarks are trademarks of their respective owners or holder.
