Mobilize your hospital
Stryker mobility solutions
**Stryker** mobility solutions

**Stryker InTouch® Bed**
Stryker’s InTouch bed delivers intuitive, advanced technology and backs it with hospital programs and processes that enable you to minimize the risk of never events while providing a higher quality of care safely, conveniently, and consistently.

**S3® Bed**
S3 Siderails have an intermediate support position to allow patients to help themselves enter or exit the bed – helping to reduce the risk of falls and injury to the caregiver.

**TruRize® Clinical Chair**
TruRize helps to promote early patient mobility. It gives caregivers the assurance they need to safely mobilize their patients.

**Prevalon® Seated Positioning System (SPS)**
Prevalon Seated Positioning System provides an easy option for clinicians to safely glide patients to an optimal upright-seated position without lifting. It is uniquely engineered to keep the seated patient in place, minimizing the need for repetitive boosting and repositioning.

**IVEA®**
IVEA is an equipment management tool that was designed by clinicians to help improve outcomes and lower costs by making patient ambulation easier, safer, and more efficient.
Patient mobility is a crucial part of the recovery process. Research indicates early and frequent mobilization can help reduce complications; falls; more functional decline; length of stay (LOS) and hospital costs – while improving patient satisfaction and physical and psychological outcomes. Yet according to a 2009 estimate, hospital patients spend more than 83% of their time lying in bed.

96.2% of a patients’ hospital stay is spent lying in bed or sitting. Mobility is the #1 area of missed care in hospitals.

76% of ambulation orders are not met.

According to researchers examining the relationship between staffing levels and patient falls, ambulation of patients three times per day (or as ordered) was the most frequently reported element of missed nursing care with 76% of nurses reporting this action being frequently or always missed.
Barriers to mobility

lack of time, staff, and fear of falling over trip hazards are just a few barriers to mobility

37% of caregiver time is spent with patients.

Caregivers are busy. Increasingly pressured to do more with less, clinicians must make the most of available tools to improve efficiency while keeping quality of care high. As such, patient ambulation remains particularly challenging for clinicians, and caregivers struggle to carry out the necessary phases of mobility. Barriers to ambulation most often cited by caregivers were related to patients’ physical symptoms such as weakness, pain, and fatigue; presence of devices such as IV lines and urinary catheters; concerns about falls; and lack of staff to assist with out-of-bed activity.

Nurses complete an average of 72.3 tasks per hour.

Nurses complete an average of 72.3 tasks per hour.
Partners in mobility

Ambulated patients have better overall outcomes.6

We’re your partner in mobility with simple, safe and efficient solutions to accommodate your patients’ entire continuum of care. We understand ambulating patients is a real challenge for caregivers today. **We have what you need to get your patients on the move as early and as often as possible.**
**Customer Support Services**

**Technical Support**
Our Technical Support comprises a team of professionals available to help with your needs. Contact via phone at 1 800 STRYKER or email at medicaltechnicalsupport@stryker.com.

**Stryker’s ProCare® Services**
Every day, you count on your medical equipment to perform at its best. With ProCare Services, our people help to ensure your equipment is ready to perform when it’s needed and make it easier to get the most from your investment. When an issue arises, we promise that we’ll solve it — performing repairs quickly and correctly.

ProCare isn’t just a service program. It’s a partnership you can count on to give you one less thing to worry about, and one more reason to feel confident you’re doing all you can for your clinicians, staff and patients.

All ProCare agreements provide:
- Stryker-authorized service representative
- Stryker-direct factory parts
- Two-hour callback response time
- Fixed service costs up front
- Increased uptime
- 24-72 hour equipment turnaround time*

*Based on the provisions of the Service Agreement and the location of the product.

**Flex Financial Program**
Our financial programs provide a range of smart alternatives designed to fit your organization’s needs. We offer flexibility beyond a cash purchase with payment structures that can be customized to meet budgetary needs and help to build long-term financial stability. Contact your account manager for more information.
