Maternity Solutions

**The backsmart solutions
for mum and baby.**

Gynnie OB/GYN Stretcher

Intuitive patient positioning.

Gynnie combines the trademark durability and features of a standard stretcher with optimum OB/GYN functionality. Ideal for pelvic exams and general use, this multifunctional stretcher can outfit an entire emergency department. Gynnie can be configured with optional OB/GYN accessories for even greater functionality.

Ultra Comfort Support Surface with heat-sealed seams help prevent fluid collection.

Optional calf supports enhance patient comfort and make patient positioning even easier.

Self-locking stirrups makes positioning mum easy and ensures her security.

Pelvic exam conversion. Three easy steps to convert the stretcher into a pelvic exam configuration with self-locking stirrups.

Glideaway siderails swing up and out for mum's comfort and provide a zero transfer gap when lowered.

Four wheel, steel ring brakes with dual side and head activators to help secure platform and increase accessibility.

Dual pedestal hydraulics help optimise stability.

Retractable fifth wheel helps improve mobility during transport.

LD304 Birthing Bed

Position bed to mum.

Today's labour and delivery needs have grown more challenging. With increasing patient weights ¹, routine epidurals, older mums and various birthing options, come more complex labour and delivery needs. The result? Greater physical demands on you. At the same time, parents are more informed and expect the best possible birthing experience.

Our length-adjustable footrests and calf supports, Lock-Rite foot section, Skoocher and electric Trendelenburg help get mum comfortable and enhance caregiving whilst BackSmart protects your back.

Ultra Comfort mattress with integrated, high-memory egg crate topper promotes comfort.

Ergonomic Design

In one easy motion, the LD304 Birthing bed's unique footrests and calf supports adjust to any patient and sustain multiple positions to enhance labour and delivery as well as clinical procedures. Positioning capabilities include upright sitting, squatting, McRobert's manoeuvre, lithotomy, side lying, knee/chest and kneeling/leaning forward.

Patented Skoocher feature

moves mum closer to the perineal edge of the bed with the touch of a button.

Patented Lock-Rite foot section glides off for quick and easy breakdown.

Length-adjustable footrests provide multiple leg positioning capabilities.

Convenient controls

One-touch electric Trendelenburg and patented Skoocher allow customised positioning with minimal effort.

Healthcare workers make **more worker's compensation claims for injury** than any other occupation - more than construction labourers, firefighters, and police officers.²

Nara Bassinet

When closeness matters most.

There are few moments in life more important than the time a mother first spends with her newborn. These first moments of an infant's life are special - it's during this time that a mother bonds skin-to-skin with her newborn, creating warmth and establishing an emotional connection.

A new idea in the world of bassinets, Nara's simple design brings mums close to their newborns during the time when closeness matters most.

- Carefully designed features help allow for mother-to-infant closeness.
- Simple design helps ensure ease of use and mobility for caregivers and helps to enhance interaction for mothers.
- Constructed and engineered for ease of cleaning and dependable durability.

Soft-edge basket with tilting feature provides access and visibility to infant for mum and caregivers. The basket is secured to the base by three points of contact for peace of mind.

Two-way drawers offer easy access to storage, helping limit disturbance to the newborn. Soft-close drawers are secure during transport with magnetic catch.

Narrow cabinet design helps to promote mother-to-infant closeness from the bedside.

Height adjustability provides ergonomic positioning for caregivers, and mother-to-infant closeness, regardless of bed height.

Activation points require two adult-size hands to use, ensuring activations are deliberate and baby remains in the crib.

Responsible paediatric care demands a stretcher specifically designed around versatility, access and ease of use. The Cub Paediatric Crib is designed to support efficient care practices while the warm, friendly appearance cultivates a healing environment for small children and their families.

Silent access doors swing open without disturbing a sleeping child. All four doors have features to ensure a child cannot open them from the crib.

Retractable fifth wheel helps improve mobility during transport.

Lowered siderails All four siderails can be lowered to provide unobstructed access which allows caregivers to have 360 degree access.

Retracting backrest reduces the gap against the siderail while swing-open access doors allow easy patient care.

Optional protective top can be equipped with intermediate support position on each side.

Stryker Furniture

For a complete maternity suite.

Symmetry II Patient & Guest Seating

Comfort. Practicality.

Symmetry seating offers comfortable, stylish alternatives for your patient rooms. With several models to choose from, you have the opportunity to customise your healthcare environment, including a lightweight, stackable Steel Chair for maximum versatility.

Symmetry Sleeper Bench

Premium space-saver.

The Symmetry Sleeper Bench provides an easy-to-use and flexible seating solution for family visits and overnight stays. The low height design allows the Symmetry Sleeper Bench to be easily stored in areas where space is limited.

Symmetry II Sleeper Chair

Home-like comfort.

Chair Model

Promote a comfortable environment for mum by providing home-like comfort her family. Stryker sleepers are available in a variety of fabrics and stains that harmonise the entire patient suite.

Symmetry Plus Recliners

A healing environment for mum.

Recliners promote recovery by helping mums get out of bed faster. Our Treatment Recliner features an infinite number of recline positions and full flat-bed position. Each Patient Room Recliner has a 159 kg weight capacity and option of stationary or mobile configuration. The Rocker Recliner and Wall-Saver both provide unmatched comfort and styling.

Symmetry II Recliner Bed

Durability and comfort.

With Stryker's Recliner Bed, expect durability without compromising comfort. Three highly versatile positions (chair, lounge and full flat-bed) will help family and friends feel right at home in mum's suite.

Bedside Tables & TruFit Overbed Table

Aesthetic. Practical.

Bedside tables include cross-lockable casters. TruFit Overbed Table easily slips under beds, stretchers and mobile recliners, with several different configurations to suit your maternity suite's needs.
