Prime X
X-ray Stretcher

Prime X Stretchers offer the safety and efficiency of Stryker’s Prime Series stretcher, with the ClearView Technology platform. The unique dual-deck design of the patient platform allows positioning of cassettes at any point under the patient, from head to foot and side to side. Open architecture accommodates virtually any size cassette. This versatile solution helps caregivers deliver exceptional patient care throughout the hospital by combining a mobile platform with ClearView Technology enabling quality imaging.

Optional integrated scales help reduce patient transfers and make patient care efficient.

Electric lift makes raising the stretcher easy by simply stepping on the pedal.

700 lb. weight capacity accommodates bariatric patients.

Articulating backrest and foot section allows complete access to the dual deck for easy cleaning.

Glideaway siderails provide exceptional coverage and tuck neatly under the litter deck for unobstructed lateral imaging and storage when you don’t need them.

Stryker’s Prime X X-ray Stretcher exclusively uses a red color scheme on its handles, siderails, bumpers and accent rings, so the X-ray stretcher is easily identified.

1. Hospital Focuses on Mobility with Big Wheel, 2005.
