Introduction to Vocera Vina for End Users Course Series (v10.3)

Course Series Description

Welcome to Introduction to Vocera Vina for End Users! This series of five web-based training modules familiarizes you with how to use the Vina smartphone application, including logging in and out, setting presence, managing the Home screen, setting Menu Options, and following best practices for protected health information. You'll also learn how to use Vina messaging, calling, and alerting features.

A note for LMS Administrators, trainers and educators: This course may be grouped in a learning management system as one course or individual courses. Organizations can choose to select assign all or some of these modules to Vocera Vina end users. Recommended order of module delivery is listed below.

Series Objectives

By the end of the course, you should be able to:

- Describe the features and navigation of the Vocera Vina smartphone application
- Explain how to manage and filter the Home screen
- Describe the Menu options
- Apply best practices when communicating Protected Health Information
- Explain how to use Vina for messaging
- Explain how to send templates on Vina
- Describe how you would receive, manage, and respond to alerts and alarms in Vina
- Explain how to use Vina for calls
