

COVID-19 update

Travel restrictions

We have been closely tracking the impact of coronavirus (COVID-19) as it has continued to spread globally. In the interest of preserving the safety and well-being of our employees, customers and communities, we are restricting travel through June 30, 2020. Restricted travel is one of the best ways to keep people safe and limit the spread.

Employee travel guidance

- Business travel is permissible only to support critical customer interactions and product supply activities.
- Examples of critical activities include direct customer interactions for essential product support, case coverage, product service, or required regulatory body audits or visits.
- We are strongly encouraging customer interactions to happen virtually or by telephone whenever possible. Work with your local sales representative to request the solution that works best for you.
- Employees who are approved to travel for critical purposes must follow additional guidance around countries or regions where travel is banned.
- Employees must “self-quarantine” for 14 days if they have direct exposure to anyone confirmed to have COVID-19 or if they travel between countries for business or personal reasons.

This is a changing and dynamic situation that we are monitoring very closely. We will continue to prioritize the safety of our employees, customers and communities when considering any travel protocols.

This guidance is intended to be temporary and may be expanded, extended or terminated by Stryker at any time.
