Mako Live Surgery Observation Program

Total Knee and Total Hip Applications

●
25 November 2021, Ankara

Ozel Cankaya Hastanesi, Barbaros, Bülten Sk. No:44, 06700 Çankaya/Ankara, Turkey
25 November, 2021,

Faculty

Dr Asim Kayaalp
Prof. Dr. Reha Tandogan

Surgeon attendee(s)

Dr. Dr. Afshin Taheriazam
Milad Hospital

Mako Total Knee objectives

- Describe the factors that can impact joint alignment and knee kinematics
- Discuss the potential benefits of robotic-arm assisted surgery
- Identify the appropriate patient selection for robotic-arm assisted Total Knee
- Explain the pre-operative planning steps for a robotic-arm assisted Total Knee
- Describe how to place the femoral and tibial arrays, collect patient landmarks, and register and verify checkpoints
- Observe a robotic-arm assisted Total Knee
- Recommend intraoperative refinements to alter component position and optimize soft-tissue balancing
- Summarize the clinical research in support of robotic-arm assisted Total Knee

Mako System Total Hip objectives

- Describe the factors that can impact leg length discrepancies and acetabular component positioning
- Discuss the potential benefits of robotic-arm assisted surgery
- Identify the appropriate patient selection criteria for robotic-arm assisted THA
- State the pre-operative planning steps for a robotic-arm assisted THA
- Observe a robotic-arm assisted THA
- · Recommend intraoperative refinements to alter component position and optimize leg length
- · Summarize the clinical research in support of robotic-arm assisted THA
