LIFEPAK® 35

monitor/defibrillator

**Intuitive.
Clinically advanced.
Proven.**

When every second matters, you need an easy-to-use monitor/defibrillator¹ designed for today's healthcare professional.

Built on a legacy of trust.
Ready for the future.

For decades, we've developed technology and devices that healthcare workers like you reach for. Our hard-earned reputation includes attention to detail and performance that goes above and beyond.

Developing ground-breaking products takes time – but the results are worth it. Every step of our process was inspired by your commitment as we addressed your needs with the goal of surpassing your expectations. This latest device may be different, both inside and out, but the focus remains the same: to help save lives.

Introducing the **LIFEPAK 35**

The LIFEPAK 35 is a clinically advanced monitor/defibrillator with proprietary tools and technology built on an intuitive,¹ modern platform for advanced patient care. It's a future-ready device designed to promote confident cardiac care² and enable clinical excellence in today's modern healthcare environment.

Intuitive

Slim, lightweight and ergonomically designed, LIFEPAK 35's large, easy-to-use touchscreen¹ and advanced clinical decision support tools provide a customizable clinical experience that helps reduce cognitive burden.¹

Clinically advanced

When every second matters, you need patient care that moves as fast as you do. With advanced connected capabilities providing insights and guidance, LIFEPAK 35 is reliably on your side – when time is not.

Proven

Built on a legacy of life-saving products and reimagined for today's healthcare professional, the LIFEPAK 35 platform carries a foundation of trust and toughness that you can count on.

Advancing patient care now and **into the future**

Working in partnership with customers like you, we’ve designed a device to help give you more control during critical events. The LIFEPAK 35 emergency response monitor/defibrillator balances advanced clinical technologies and ease-of-use^{1,2} in a device that you can rely on in challenging situations.³

Built-in documentation tools can help reduce time to treatment and calculation errors.²

cprINSIGHT[®] helps improve CPR performance by reducing pauses* during chest compressions.⁵

Create a custom events list of up to 80 medications and/or treatments^{2,7}

Quickly and easily streamline patient care by setting custom-timed reminders for medications and therapies.²

Front-facing, right-angle cable ports enable easy access to monitoring accessories.²

Therapy options, including pediatric AED mode, help treat patients with escalating biphasic energy from 1J to 360J.^{1,6}

Streamline workflow by transmitting data for analysis via built-in WiFi or Bluetooth.²

Code/Real-time clock allows a caregiver to switch between real-time and elapsed time during an event.²

The intuitive user interface is easy to use and requires minimal training.^{1**}

Live view 12/15-lead with STJ Insight[™] provides a graphical representation of the ECG to help diagnose myocardial injury.²

A big, tough touchscreen

The high-definition, 10.4" touchscreen enables a customizable display of our next-generation capabilities. The durable, chemically reinforced glass³ is double glove-friendly and is designed to withstand both direct impacts and drops.² You can view up to 12 monitoring parameters at once while also sorting and renaming leads.³

FLEX lithium-ion dual battery system allows for nine hours of monitoring.⁴

The integrated kickstand provides additional stability and allows for optimal viewing on the crash cart.

* Pre-shock pauses were reduced to an average of 8 seconds vs. an average of 22 seconds with the conventional AED. CCF with cprINSIGHT[™] was 86 percent vs. 80 percent in the conventional AED group.

** Based on participants surveyed.

Advanced technology promotes **clarity and confidence**

Focus on patient care with our clinically advanced therapy tools

*As of October 2024.

cprINSIGHT

LIFEPAK 35 is the only professional monitor/defibrillator with an algorithm that identifies a shockable rhythm without pausing CPR.*

On-screen abbreviated instructions

Provide guidance for non-invasive pacing and synchronized cardioversion.²

Post-sync decision menu

LIFEPAK 35 is designed with patient safety in mind. When performing synchronized cardioversion, a mode selection menu is displayed on screen automatically after each shock, prompting the clinician to consider the patient's needs.²

Streamline your **workflow**

By focusing on your needs within the hospital protocols and communication channels, we empower you to excel in a high-stakes environment. The LIFEPAK 35 streamlines the care process by capturing important clinical data and events in the patient record and provides custom-timed reminders for medications and therapies, which may assist in patient care.^{1,2}

Stay connected with LIFENET digital healthcare solutions⁸

Stay ready with LIFENET Asset

Remotely manage your devices, receive status alerts and view static/dynamic device location.⁹

Respond effectively with LIFENET Care

Drive better care by transmitting, sharing and capturing patient data to enhance team communication and coordination.⁹

Review quickly with CODE-STAT™

Automatically access or share data, review performance and identify improvement opportunities.

LIFEPAK 35 is ergonomically designed for portability and built **LIFEPAK TOUGH™** to withstand drops and falls within the demanding hospital environment.³

A legacy of trust

For six decades, we've partnered with our customers to design solutions and develop technology that help save lives. You'll find more than half a million units in use today on fire rescue rigs, ambulances, and hospital crash carts worldwide.¹⁰ Our uncompromising commitment to quality produces devices you can count on in critical situations – so you can focus on what you do best: saving lives in the community, the field and the hospital.
