LIFELINKcentral™ AED program manager

Readiness matters.

Take charge with a complete, connected solution for AED program management.

AEDs work.

But only if they're ready.

Sudden cardiac arrest (SCA) can happen to anyone, anywhere. That's why public access defibrillators are so important. They put lifesaving technology where it can do the most good. Ongoing system maintenance, however, has been time-consuming and at risk for human errors—until now.

With LIFELINKcentral AED program manager, managing your AEDs is easier and more accurate. Not only will you be able to see remotely that your AEDs are ready when you need them, you'll also save time and money on your AED program management by eliminating manual checks for connected devices and more efficiently tracking status even for non-connected ones.

Connected and ready.

With the LIFEPAK® CR2 defibrillator, a Wi-Fi® connected AED, LIFELINKcentral program manager facilitates self-management. Location, battery status and other readiness information is automatically collected by the software for easy management—whether you have one AED or 100, in a single office or across thousands of miles. LIFELINKcentral AED program manager even sends you alerts of conditions affecting AED readiness.

For each connected LIFEPAK CR2 AED, you can:

- Remotely monitor readiness information
- Locate on a map and detect location changes
- Receive alerts on situations affecting readiness such as battery status
- View the status of all connected AEDs
- Be alerted when an AED has been used
- Automatically send SCA event data via Wi-Fi to emergency responders who are equipped with LIFENET® AED Event Viewer software.
- Have emergency responders wirelessly transmit event data from AED Event Viewer to hospital and medical caregivers
- Get notifications if batteries or electrodes are expiring or have expired

Complete management system.*

You can manage all your AEDs with LIFELINKcentral AED program manager, even those that aren't connected. Once the non-connected device information is entered manually for you, you can update inspection data on a regular schedule. You'll have complete documentation of your readiness. You can even pinpoint AEDs on a map and create alerts for scheduled battery or electrode replacement.

A plan for every AED program.

LIFELINKcentral AED program manager Basic license is included with each Stryker connected AED, but there are numerous reasons to invest in a full-featured service package.

LIFELINKcentral options	Licenses		Service package
	Basic Included with Stryker connected AED	PRO Account fee applies ¹	Premium Per AED fee applies ¹
