Nano-Coating Large Jaw, Open
Sealer/Divider LF4418

Make an
Impact

Choose the device you know and impact
the sustainability your hospital needs.

In-line testing

Multi-point inspections

Every device

Since 2007, we've reprocessed eight different LigaSure devices. While the devices have changed, our approach to quality remains the same.

100% in-line testing

Before being sent back to you, all reprocessed devices undergo thorough verifications:

Third generation LigaSure Impact with over 200,000 devices reprocessed¹

The Reprocessed LigaSure Sealer/Divider is a bipolar electro-surgical instrument intended for use in open surgical procedures where ligation and division of vessels, tissue bundles and lymphatics is desired. The Reprocessed LigaSure Sealer/Divider can be used on vessels (arteries, veins, pulmonary arteries, pulmonary veins) up to and including 7 mm. It is indicated for use in general surgery and such surgical specialties as urologic, vascular, thoracic and gynecologic. Procedures may include, but are not limited to, Nissen fundoplication, colectomy, cholecystectomy, adhesiolysis, hysterectomy, oophorectomy, etc. The LigaSure system has not been shown to be effective for tubal sterilization or tubal coagulation for sterilization procedures. Do not use the LigaSure system for these procedures.²
