

# Pulse

## Intelligent Delivery Platform™

**Save more, worry less**

# Save more with Pulse

The typical orthopedic facility is spending about \$100,000 in forefoot sterilization costs per year.<sup>1</sup> Pulse sterile inventory works against these costs, but the benefits don't stop there.

- \$90 cost reduction/case on forefoot sterilization<sup>2</sup>
- 80% decreased need for instrument trays requiring sterilization<sup>2</sup>
- 72% decreased packaging footprint compared to existing packaging<sup>3</sup>
- 82% reduction in OR footprint compared to reusable instrument trays<sup>2</sup>

# Worry less with Pulse

Missed or delayed surgeries are a real concern. According to both surgeons and administrators, the #1 challenge in the patient care experience is having the correct equipment on hand for every case.<sup>4</sup> Other challenges include:

- Sterilization capacity
- Staffing shortages
- Lack of storage space
- Cost constraints
- Inventory management
- Supply shortages

## Pulse can help

RFID technology keeps a constant eye on your inventory and automatically triggers replenishment orders, so you never miss or delay a forefoot procedure due to sterility or supply challenges.

# Powered by RFID technology

Radio frequency identification (RFID) is the brain inside the Pulse platform. As inventory flows through a Pulse smart cabinet, data is consistently updated providing 24/7 real-time inventory management and hassle-free re-stocking, so you never miss a beat.

- Cellular modem eliminates need for local Wi-Fi connectivity.
- Data is refreshed consistently so on-hand inventory and product expiry is monitored in real-time.
- Secure key-card access keeps sterile inventory protected.
- Large 12.5 cubic feet internal storage capacity holds and organizes all your sterile Pulse inventory.
- Handrails and heavy-duty casters for easy maneuverability.
- 120VAC, 60Hz electrical hook up fits into any standard power outlet.
- 2-hour battery back-up provides protection against sudden power losses.

# The brands you love, now 100% sterile

## Available products

### DartFire Edge Cannulated Screw System

DartFire Edge® is Stryker's latest innovation in cannulated screw technology. Headed and headless 2.0, 2.5, 3.0, 3.5, and 4.0mm screws are available in a wide range of thread options.

### Ortholoc 3Di and Crosscheck Plating

Ortholoc® 3Di and Crosscheck® plating systems are now available through Pulse in fully sterile configurations for primary and revision MTP and Lapidus procedures.

### Phalinx Hammertoe

Phalinx® Hammertoe is Stryker's flagship solution for distal extremity fixation. Now, with Pulse, the entire procedure can be completed from a single sterile box that could fit into your pocket.

### EasyFuse Dynamic Compression System

EasyFuse® is Stryker's latest innovation in nitinol staple technology. Easyfuse is designed to deliver robust, dynamic fixation and a single set of sterile instruments that can be used for any implant option.
