## HCPCS II device codes<sup>4</sup>

### C1886

Catheter, extravascular tissue ablation, any modality (insertable)

### A4649

Surgical supply; miscellaneous

**Notes:**

- “N/A” indicates that this concept does not apply, or that Medicare has not developed fee schedules in those settings of care.
- Codes 64633, 64634, 64635, 64636, & 64999 (spine) and codes 64624 & 64640 (knee) on destruction by neurolytic agent for RF ablation may be performed as bilateral procedures. If performing radiofrequency on both sides of the body, report these codes using the appropriate bilateral modifier (-50).
- Do not report codes 64633, 64634, 64635, and 64636 for non-thermal facet joint denervation including chemical, low-grade thermal energy (<80 degrees Celsius), or any form of pulsed radiofrequency. To appropriately report any of these modalities, use 64999.
- Diagnostic procedures are performed with the intent to determine if radiofrequency ablation should be considered as a treatment for pain management. Please refer to applicable Medicare local coverage determination for additional information.
