

Simple. Versatile.
Brilliant.

Sonopet **iQ**
Ultrasonic Aspirator System

Soft tissue resection / Bone resection / All-in-one system

Sonopet

iQ

Simply **better**¹

The Sonopet iQ system delivers even more of what our customers love. We've raised simplicity and reliability to an even higher level for consistently excellent O.R. surgical experiences. We've also added semi-autonomous functionality and customization so you can do more with the Sonopet iQ with less time and effort.¹

Trusted resection and power

367%
faster fibrous
tissue resection¹

133%
faster bone
cutting¹

75%
more precise
suction control²

48%
faster setup time¹

**setup success rate
on first attempt by
untrained users¹**

**of ACGME facilities
rely on Sonopet³**

Rapid readiness for any O.R. team

iQ Control: On-demand customized performance

Gain a new level of control with our exclusive blend of RFID technology, algorithms and other elements. These smart features are always in play, automatically adjusting and customizing settings to optimize performance throughout your entire procedure.

iQ Connect: RFID-enabled intelligence transfer

Create and store your custom user profile once, and it's ready to engage when you are. With RFID technology, your preference data for peripheral devices (e.g., tips, handpiece and irrigation cassette) is instantly transmitted to the console, effortlessly activating the exact settings you want.

iQ control and iQ connect

RFID technology instantly changes settings based on connected tip or user profile

Faster resection and more power⁴

Large touchscreen interface

Precise settings for power, suction and irrigation at lower levels

Unparalleled customization
One-step retrieval of surgeon profile
Can start the case using **surgeon's defaulted profile**

Independent or synchronized settings for power, suction and irrigation

Hand controller for remote control from sterile or non-sterile field

Pulse Control's hard and soft tissue algorithms optimize Sonopet iQ's existing ultrasonic energy and cavitation, then modulate energy dose to the tip, creating waveforms that tailor resection performance⁴

Pulse Control, toggle on/off feature for quick change in pulse control settings

Designed for controlled suction pinch valve with ability for reduced suction around critical structures⁴

Integrated irrigation cassette eliminates exterior wheel and tube threading

Soft tissue/bone cutting tips and tubing all compatible with the same handpiece

Front facing connections with color-changing feedback; port light signals proper setup

One-step connections for irrigation, suction, tubing and sleeve

Irrigation integrated into the handpiece to improve visibility and control⁴

Three foot pedal options;
Basic Foot Pedal
Advanced Foot Pedal
Advanced Wireless Foot Pedal

Intuitive setup; all components labeled or color coded, and steps are non-sequential

Gain Stryker's advantage

Proprietary Longitudinal Torsional (LT) Technology⁴

Couples longitudinal with torsional vibration for a 25,000x per second non-rotational motion that cuts bone without affecting soft tissue.

Emulsifies hydrous soft tissue (tumor, fat, parenchyma) without impacting vital anhydrous tissue such as vessels, nerves and tendons.

Resects rigid bone or hard tissue while surrounding elastic soft tissue vibrates away from the cutting tip.

Helical reliefs redirect the ultrasonic energy from purely longitudinal to combined torsional component so tissue distal to the tip is unaffected by cavitation.

Unmatched tip offering

16 tips to handle soft tissue, fibrous tissue and bone cutting all in one handpiece

Various lengths, diameters, tip styles and frangible sections for adjustable surface exposure

RFID technology recognizes tip and adjusts to the ideal settings

Improved resonance tracking per tip type (better bone cutting and fibrous tissue resection)⁴

Complete tip is visible inside the unopened packaging

New Broad Knife tip is our broadest and thickest tip for enhanced power to cut bone.

Versatility and value

Versatility optimizes your opportunities and your return on investment. So we've designed Sonopet iQ as a multi-functional system to address clinical and administrative needs. In this manner, we strive to maintain your satisfaction far beyond the initial sale.

In the O.R.

- One console serves multiple specialties
- One handpiece compatible with soft tissue/bone tips and tubing
- Only one system to learn; reduces staff training and potential user errors
- Unmatched simplicity; readiness with any O.R. team
- New customization
- Proprietary Longitudinal Torsional (LT) Technology
- Semi-autonomous RFID system optimization
- More features, speed and power than ever before
- Fast setup and resection for smooth case flow⁴
- Consistently excellent surgical experiences⁴

And beyond

- Flex Financial customizable acquisition options
- Onsite implementation and training
- Year-round education and training options
- Localized ProCare Services; 250+ technicians nationwide

We're in this together

We share a goal to make healthcare better. Pairing your clinical expertise with our innovative procedural solutions – plus supportive customer service, continuing education and financial acquisition options – can help us jointly achieve this goal.

Test your iQ

Experience Sonopet iQ system's features and benefits first hand. For a demo or more information, call your Neurosurgical sales representative or **800 253 3210**. You may also learn more at neurosurgical.stryker.com.

1. All comparative metrics and claims are Sonopet iQ compared to Sonopet 1. Stryker internal test data on file.
2. Sonopet iQ has improved suction control for delicate resection rates with 75% lower achievable pressure settings compared to the first generation Sonopet. Stryker internal data.
3. The Sonopet Ultrasonic Aspirator is currently being used in 104 out of 112 ACGME teaching institutions in the U.S. Stryker internal data on file.
4. Stryker data on file
