The Problem with Bath Basins¹

A study across 88 hospitals tested 1,103 basins and found:

100% of the hospitals had **at least one contaminated basin**

62% of the basins were **contaminated with bacteria**

Of these basins:

45% were contaminated with gram negative bugs

38% were contaminated with MDROs bugs

The Solution with Sage Pre-packaged Bathing

With the introduction of Sage Pre-packaged Bathing over a 12-month period, a hospital saw²:

59% decrease in catheter-associated urinary tract infections (CAUTI) **in their critically ill patients.**

With the removal of bath basins and use of the prepackaged cloths, over a 12-month period, another hospital saw³:

89.5% reduction in CAUTI rates across **two med/surg units.**
