Foot and Ankle portfolio

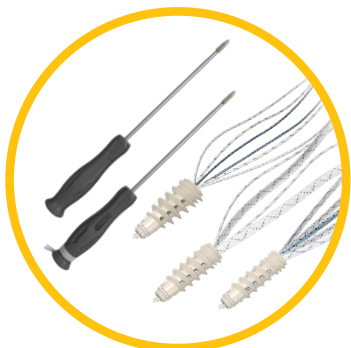

Iconix platform

An all-suture anchor platform, available in 14 different suture and tape configurations, including with and without needles.

Omega

An all-PEEK self-punching knotless anchor with screw-in fixation. With a decoupled eyelet-screw construct, the platform is designed to offer unobstructed complete cannulation. Drills, taps and awls are available.

AlphaVent

AlphaVent is a versatile, hard body screw in anchor platform that offers 22 different implant and suture configurations. The implant employs dual-thread technology to optimize engagement in cortical and cancellous bone.^{1,2}

Procedures⁴

Medial ankle:

- Posterior tibial tendon repair
- Kidner procedure
- Spring ligament repair
- FDL transfer
- Deltoid ligament repair

Lateral ankle:

- Brostrom/Gould lateral ankle repair
- Primary and secondary ligament reconstruction
- Arthroscopic lateral ankle repair
- Suture tape augmentation and double row repair

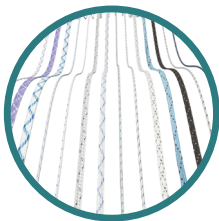

Achilles:

- Achilles repair and reconstruction
- FHL transfer

NanoTack

Smallest all-PEEK suture anchor implant with two points of fixation for increased strength. Available in tape and suture options.³

XBraid S, XBraid TT and Force Fiber

A comprehensive suture and tape portfolio, featuring more than 56 configurations, including specialty options.

Biosteon Intraline

A fully threaded screw-in anchor available in multiple sizes. Biosteon is a composite of hydroxyapatite (HA) and non-crystalline poly-L-lactide (PLAA).

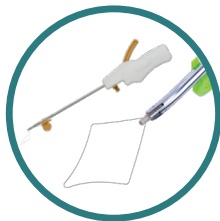

PEEK Zip

A fully cannulated anchor that features a trocar-tip inserter, eliminating the need to tap.

PEEK and Titanium Intraline

Fully threaded anchors with a suture eyelet. The Force Fiber suture eyelet runs through the center of the anchor, providing flexibility for the working suture.

CinchLock SS and CinchLock Flex

Suture anchor systems that provide speed and simplicity with their “one-click lock and release” anchor deployment systems.

ReelX STT

A self-punching knotless anchor that features an incremental tensioning mechanism that allows for patient-specific tissue tensioning.

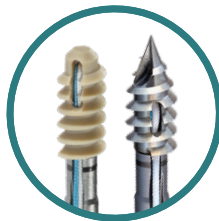

Piton 2.8mm

A soft tissue fixation implant, for the secure reattachment of soft tissue to bone. It offers a minimally invasive footprint with direct insertion.

Piton 3.5mm knotless

A fixation implant that completely eliminates knot tying and provides direction insertion. No tapping, punching or pre-drilling required.

Gravity

Fully threaded PEEK or Titanium anchor with tapered needles available.

G-Force tenodesis

A Radiolucent PEEK-Optima material implant that allows for intraoperative tendon tensioning via a suture loop guide rod.

Biologics portfolio

TissueMend

An acellular, collagen membrane used to repair and reinforce soft tissues.

RegenKit THT System

A system designed to be used for the safe and rapid preparation of autologous platelet-rich plasma (A-PRP) from a small sample of blood at the patient's point of care.

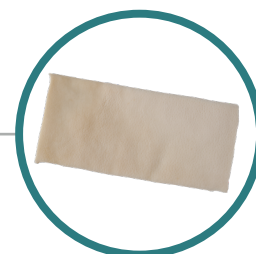

Allografts

Stryker partners with AlloSource to offer a wide variety of allografts used in soft tissue repair and augmentation.

ProChondrix CR

A laser-etched, cryopreserved-fresh osteochondral allograft, that helps deliver the components for articular cartilage restoration.

GraftJacket Now Ultra-Thick

A pre-hydrated, ready to use acellular dermal matrix used for reinforcement, support and protection of soft tissue.

Arthroscopy portfolio

CrossFire 2

A 2-in-1 arthroscopy resection console that drives both Shaver and RF.

Foot and Ankle shavers and burs

Full portfolio of shavers and burs designed for small joint applications.

SERFAS RF

Both suction and non-suction RF ablation wands designed for small joint applications.

CrossFlow

Easy to use, plug and play arthroscopy fluid pump, with customized profiles for small joint applications.
